G.J. Meulenbeld's Additions to his "Sanskrit Names of Plants and their Botanical Equivalents" (s. Meulenbeld, pp.520-611)

Dr. Meulenbeld was kind enough to prepare the following list (which I subsequently edited) at my request; it covers most of the plant-names mentioned in Surapāla's text, but missing in Meulenbeld, pp.520-611. As regards works already referred to by Dr. Meulenbeld in his previous list, the abbreviations for these are the same as those listed in Meulenbeld, pp.VII-XII (s. also the bibliography on pp.630-645). Other works and the abbreviations referring to them have been listed below.

In a letter to me dated 8.7.1984, Dr. Meulenbeld writes: "The botanical names have not been checked in the Index Kewensis, as I did previously. I adopted, as far as possible, the names of: Medicinal plants of East and Southeast Asia: Attributed properties and uses, compiled by Lily M. Perry with the assistance of Judith Metzger, The MIT Press, Cambridge, Massachusetts, and London, England, 1980; if not found there, I took the names of WIRM."
